SIGNAL PROCESSING

Cumulative contents of Volume 40

Volume 40, No. 1, October 1994

Special issue on COST#229 International Workshop on Adaptive methods and Emergent Techniques for Signal Processing and Communications
Guest Editor: D. Docampo

Editorial 1

Biography 3

D.T.M. Slock and K. Maouche
The fast subsampled-updating recursive least-squares (FSU RLS) algorithm for adaptive filtering based on displacement structure and the FFT 5

J. Riba and G. Vàzquez
Bayesian recursive estimation of frequency and timing exploiting the cyclostationarity property 21

F. Vanpoucke, M. Moonen and E.F. Deprettere
Direction finding of multiple wide-band emitters using state-space modeling 39

J. Cid-Sueiro, A. Artés-Rodríguez and A.R. Figueiras-Vidal
Recurrent radial basis function networks for optimal symbol-by-symbol equalization 53

M. Ibn Kahla, Z. Faraj, F. Castanie and J.C. Hoffmann
Multi-layer adaptive filters trained with back propagation: A statistical approach 65

S. Carrato
Image vector quantization using ordered codebooks: Properties and applications 87

G.E. Øien and S. Lepsøy
Fractal-based image coding with fast decoder convergence 105

Vol. 40, Nos. 2–3, November 1994

Papers

R. Marabini and J.M. Carazo
Practical issues on invariant image averaging using the bispectrum 119

E.R. Dougherty and R.P. Loce
Precision of morphological-representation estimators for translation-invariant binary filters: Increasing and nonincreasing. 129

J.M. Morris and Y. Lu
Discrete Gabor expansion of discrete-time signals in $l_2(\mathbb{Z})$ via frame theory 155

V. Britaňák
On the discrete cosine transform computation 183

P.J.S.G. Ferreira
The stability of a procedure for the recovery of lost samples in band-limited signals 195

J.-J. Shyu and S.-C. Pei
A new approach to the design of complex all-pass IIR digital filters 207

Elsevier Science B.V.

C. Pieralli and G. Tribillon
Contouring using interferometric fringe digital processing with the Hough transform: Application to the detection of cavities on polished surfaces 217
A. Schatzberg, A.J. Devaney and A.J. Witten
Estimating target location from scattered field data 227
J.R. Dickie and A.K. Nandi
A comparative study of AR order selection methods 239
H. Yang and Y. Hua
Asymptotic properties of 2-D MUSIC estimator and comparison to 2-D MP estimator 257
S. Palit and P.P. Kanjilal
On the singular value decomposition, applied in the analysis and prediction of almost periodic signals 269
M.K. Ibrahim
Novel digital filter implementations using hybrid RNS-binary arithmetic 287
M.-C. Yang and J.-L. Wu
Two-dimensional polynomial residue number system 295

Short communications

A.N. Kalashnikov and A.F. Nazarenko
The design of the maximal SNR linear phase FIR digital filters 307
P. Park and T. Kailath
An extended inverse QR adaptive filtering algorithm 311
B.P. Ng, M.H. Er and C. Kot
A MUSIC approach for estimation of directions of arrival of multiple narrowband and broadband sources 319
C.P. Callender, S. Theodoridis and C.F.N. Cowan
Adaptive non-linear equalisation of digital communications channels 325
S.-C. Pei and M.-H. Yeh
Modulation-based time-variant filter design using Wigner distribution 335

Erratum 341
